

MoSCoW requirements + user stories

Earn It Group 5

1. General requirements:

- Must-haves:
 - Users shall have the possibility to register on the website.
- Should-haves:
 - Export any invoices in a specific format (PDF, DOCX, etc.)
 - A chat function for students, companies, and staff to communicate.
- Could-haves:
 - A feedback system (rating, comments)

2. Students:

- Must-haves:
 - I want to view the complete description (including the number of hours) and the description of the job.
 - I want to be able to overview the progress this week and confirm it to the companies so that I can ensure my progress is recorded properly.
 - I want to put in the hours and comments at the end of each working session so that the company can see my progress as well as my clarification.
 - I want to have an archive of past invoices so that I can trace back the history of being paid in the past few months.
- Should-haves:
 - I want to have a personal profile where I can put in my work experiences, CV, etc. so that employers can see whether a student has the experience the company deems appropriate for the job.
 - I want to filter invoices by a specific time.
 - I want to be able to search for jobs based on keywords or positions or hours.
 - I want to view the status of my enrollment to the companies.

3. Companies – employee:

- Must-haves:
 - I want to be able to view all the hired students.
 - I want to be able to view the progress of each hired student.
 - I want to be able to approve the hours worked at the end of each week.
 - I want to be able to flag suspicious submissions for investigation.
 - We should be able to access the invoices for a certain period of time.
 - We should be able to manage the job listings (alter the description, delete/add a position, etc.)
- Should-haves:
 - We should be able to view the status of each job listing.

4. Staff – Admin:

- Must-haves:
 - We must be able to link students and companies for any specific job position.
 - We must be able to view a complete list of companies and students.
 - We can view companies each student was linked for and vice versa.
 - We can view all flagged submissions and are able to accept or reject them.
- Should-haves:
 - We should be able to view the hours' breakdown of the flagged submissions.
 - We should be able to accept or deny job listings posted by companies.

5. Security Requirements:

- Must-haves:
 - A role system that has different permissions for each actor
 - Permitted users should be able to access their data at any given circumstances.
 - Authentication system
