

# Prototype report – Team EarnIt 5

Our prototype included what we considered to be the most relevant and representative pages, that our application was going to use. We did not go into very many details, as some of the requirements were still slightly unclear, causing uncertainty about certain aspects of the user interface.

We made it directly in PowerPoint, but we included features like working buttons and a functional dropdown menu for the profile button.

## Prototype content

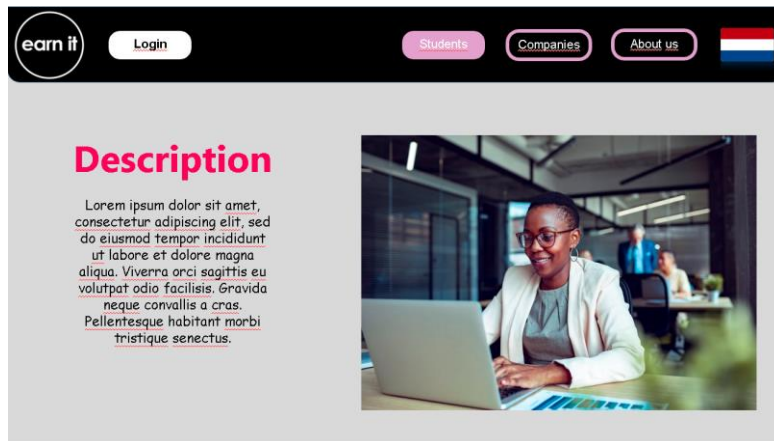

- Login / register pages for both companies and students

The mockup displays the 'earn it' logo at the top. Below it is a login section with fields for 'Username...' and 'Password...', a link for 'Forgot password?', and two buttons: 'Student Login' and 'Company Login'. A link 'Not a member yet? Register here' is positioned below the login buttons.

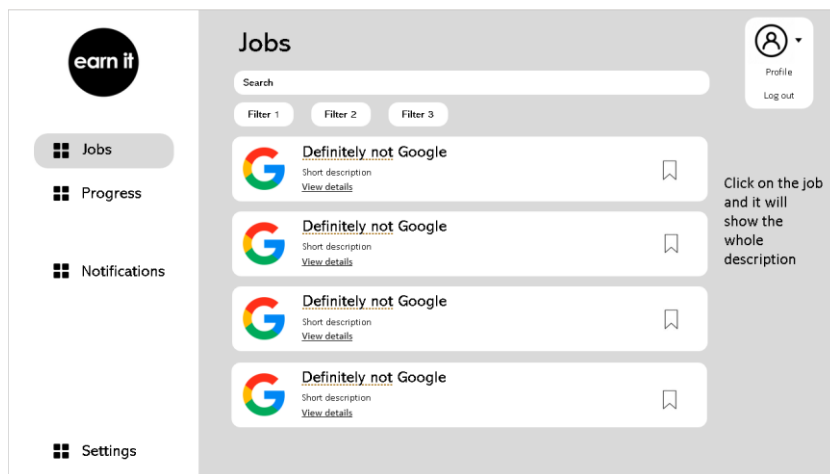

---

The registration section is divided into two columns. The left column features a 'Student' button and a 'Company' button. Below these, a note states 'Field with \* are mandatory'. The form includes fields for 'First name...\*', 'Last name...\*', 'Date of Birth\*' (with sub-fields for 'Day...', 'Month...', and 'Year...'), 'University...\*', 'Study...\*', 'Study Level...\*', and a large 'Skills...' text area. The right column features the 'earn it' logo, followed by fields for 'E-mail...\*', 'Password...\*', and 'Verify Password...\*', and a 'Sign up' button. A link 'Already a member? Login here' is located at the bottom of the right column.

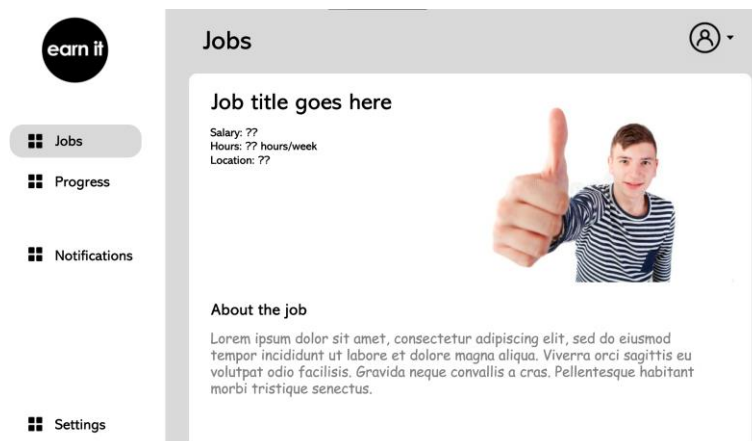

- Home page / about us (we found out later it was not needed)

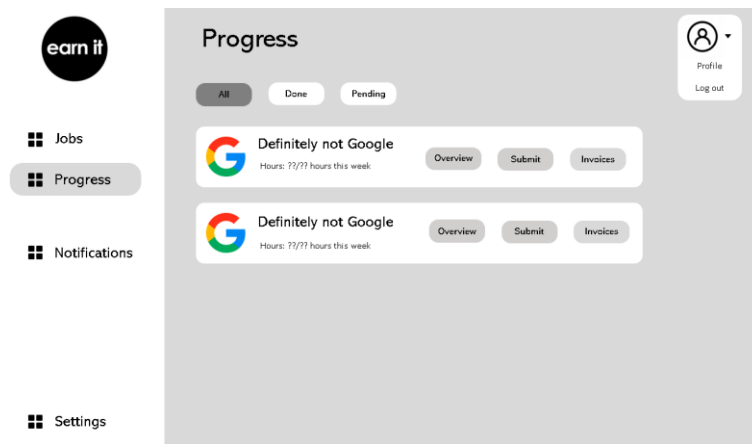

- Active jobs overview
  - The jobs in the list were clickable and they opened the job description prototype page (shown below).

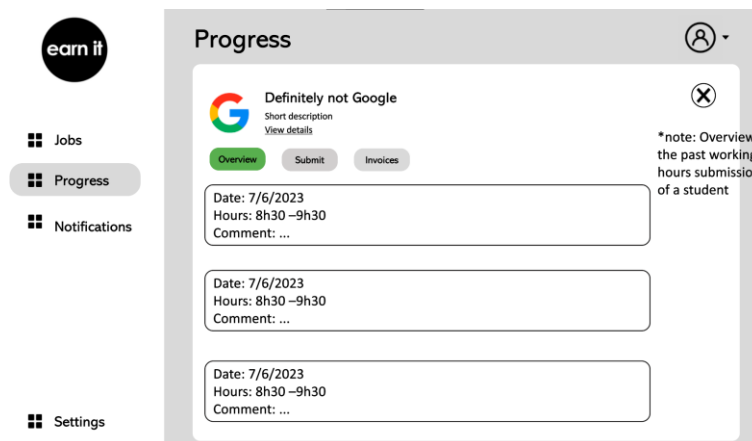

- Individual job page with description and salary

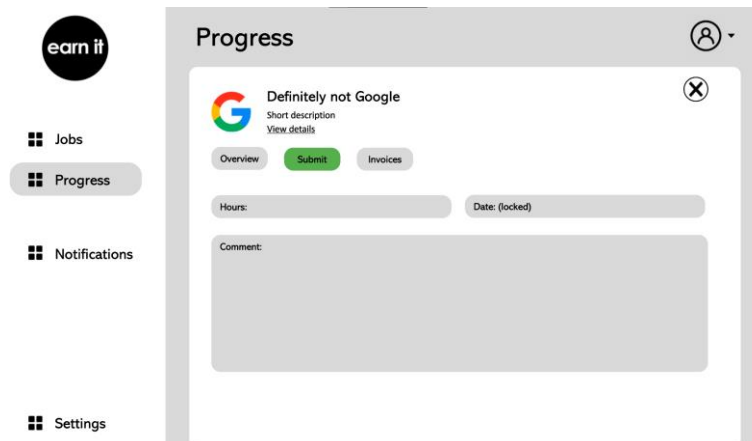

- Progress overview page (for past weeks)
  - The top right profile menu is a dropdown, and it could be opened and closed while presenting.

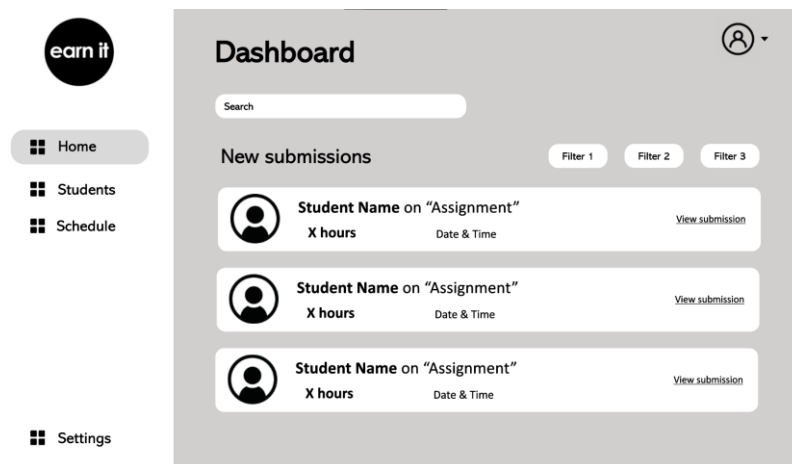

- Week submissions overview

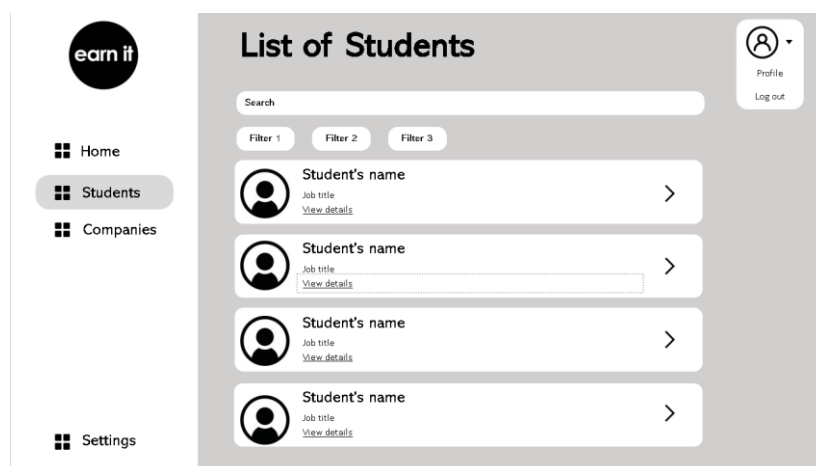

- Submission page

- Company dashboard with submissions overview

- Company list of students

Based on feedback, we changed the registration page and deleted the homepage since it is not required. We also updated certain aspects of the design, therefore the prototype does not accurately resemble the final product.
